To Whom It May Concern,

KenCon Construction recently completed work on our 2005 \$4.5 million bond construction project. This particular project included a 6 classroom wing addition to our high school, a 5,000 square foot transportation facility, \$500,000 worth of renovations at our elementary school, and a new \$2 million high school gymnasium

All projects were completed AHEAD of the original timeline and overall the project came in approximately \$164,000 UNDER budget. As superintendent of schools, I feel confident in speaking on behalf of our board of trustees in saying that we could not be more pleased with the outcome of our construction project.

From the beginning of our project Mr. Clayton Kennedy or Mr. Bob Skrobarczyk attended every board meeting for the purpose of construction updates. They handled themselves with the utmost professionalism and integrity throughout the duration of the project.

In our business, a bad construction project can draw great criticism upon the superintendent and board, many times ending in a loss of trust from the community it serves. However, a good project can do exactly the opposite – solidifying the trust and respect the community has in its school system. The job that KenCon Construction has done for Florence ISD has only served as a catalyst in deepening the trust and confidence the community has exhibited in our district.

If you are looking for a company that has the potential and integrity to bring your projects in under budget and ahead of schedule then KenCon should be the end of your search. I recommend Clayton and his company with complete confidence, as I am sure, all of our board would do as well. If I can be of any further assistance, please do not hesitate to call or e-mail me.

Sincerely,

Mike Martindale
Superintendent of Schools
Florence Independent School District
