To whom it may concern:

We are pleased to recommend Kencon Constructors based on the excellent work they have completed on several of our projects. Most recently, as the Construction Manager At-Risk, they completed Bowie Elementary School in July 2006 for the San Marcos Consolidated Independent School District.

Due to the recent increase in the inflation rate, we were faced with a project that was over budget. Kencon worked diligently with our office and the district to value engineer almost one million dollars from the project and bring the project in budget.

Kencon was also able to accelerate the construction schedule to allow an early summer move-in by the district.

Both Barry Osborne as Superintendent and Charlie Lloyd as Project Manager did an excellent job of shepherding this project to a successful conclusion. We certainly look forward to working with Kencon on our future projects.

Sincerely,

Joe Osborn, Construction Administration
