---

To whom it may concern:

I am happy to recommend Kencon Constructors as an excellent school contractor. Here at San Marcos CISD, Kencon served as "CM at Risk" on our new Bowie Elementary School, and it is important to note that they worked extremely hard with the District and our architects to "value engineer" approximately one-million dollars from the design to bring the project in budget.

Charlie Lloyd and Barry Osborne did a great job of accelerating the project schedule by two months which allowed us to move-in early, this past summer, and begin the school year in the new building. They were also very fair in pricing additional scope requested by the District.

Kencons' quality of work is good and they have been very responsive to warranty issues.

A handwritten signature in black ink that reads "Mike Horton". The signature is written in a cursive, flowing style.
